The History of
The Single Serve Kitchen

The Single Serve Kitchen was established in 1998 by Debbie Ledien. It originally started out as a individual meal delivery service, which eventually expanded into providing catering options.

This business truly started out as a "family operation". Debbie has called upon her children, husband and close friends for ideas, inspiration and physical help. Ultimately, every family member has become involved in some aspect of the business, which makes it all worth while.

Today, the Single Serve Kitchen has grown into a quality catering service. We enjoy making your event special, with our own personal family touch!

Service is Our Specialty

Items in this pamphlet are examples of what's available in our Catering Menu. There are many more items to choose from and we change our selection as to give a wide variety to all.

If you don't see something please ask us, as we are here to help with all your food needs.
